 - Streak-free tan that lasts up to 1 week

Did You Know?

The Dangers of Tanning Beds

- Exposure to the sun and tanning beds can lead to premature aging of the skin.
- Just one indoor tanning session increases the chance of developing melanoma by 20%. Each additional session during the same year boosts the risk almost another 2%.
- Skin cancer is the most common form of cancer in the United States.
- More than 3.5 million cases of skin cancer are diagnosed annually.

The Dangers of Spray Tanning

- The use of DHA in spray-tanning booths as an all-over spray is NOT FDA approved.
- Spray tanning creates the possibility of inhaling not only DHA, but other harmful chemicals.
- Inhaled or ingested DHA have risks that are NOT present when using an all natural tanning lotion, like True Natural's.
- Most spray tan studios don't provide the proper equipment to protect you.

True Natural Self Tanning Products

True Natural Self Tanners utilize a combination of naturally occurring sugars found in certain fruits and vegetables that react with the outer layer of skin, creating a non-toxic reaction which gives a tanned look. A streak-free tan develops in 3-4 hours, lasting up to 1 week. Maintain healthy skin with a natural glow - True Self Tanners are free from harmful chemicals and safe for regular use!

The 4 oz size lasts for 4-5 full body applications.

Perfect Tan, Face Moisturizer

This Gradual Self Tanner and Tinted Moisturizer 2-in-1 is packed with Organic Macadamia nut oil, Peony and Mistletoe extracts and ideal for sensitive and dehydrated skin. Peony moisturizes while Mistletoe soothes skin.

Use as a day cream - a tan will develop and deepen throughout the day. Reapply until the desired tan color is achieved. To maintain a healthy glow, reapply at least twice per week.

Don't forget the neck & decollete areas for a perfect, sun-kissed look.

Tips for a Flawless Tan

1. Shower and exfoliate.
2. Towel-dry skin completely.
3. Apply tanner generously like a body lotion and massage into skin. Don't be skimp!
4. Only use a small amount on elbows, knees, ankles, feet and hands.
5. Wash hands thoroughly with soap and water
6. Wait 10-15 minutes until self-tanning lotion is absorbed before dressing to avoid stains.
7. To maintain tan level, repeat application after 5-7 days. To deepen tan, repeat after 1-2 days.

Special Tip:

Apply lotion in the evening and wake up to a gorgeous tan!
